It is common in economic accounts of environmental problems to underline the role of institutions in shaping policy outcomes. What is most striking about the UK s inherited structures and policy ideas is (at least) the role of the Levene Report. The Levene Report is a commonly used reference to the reports official title Securing Britain in an Age of Uncertainty: The Strategic Defence and White Paper in 1984, a time with a distinctly different institutional, financial, and policy context.

The coalition Government inherited the debt from the previous Labour Government and was faced with the challenge of reducing the structural deficit. Some of the key challenges faced by the Government included: securing the economy; reducing the budget deficit; and promoting growth and jobs.
